

Product Support Integration Data Visualization

Project Title	Product Support Integration Data Visualization
Project Summary	Are you ready to use your business intelligence skills to analyze, and create a data environment that will directly support the mission-readiness of the US Navy? You will work with a new Data Mgt./Analytics team to transform data into dashboards while leveraging Wiki/Jira applications.
Country	United States
Country/Region of Focus	United States

Project Description

Looking for creative, pro-active thinkers that can help support Product Lifecycle Data Management within a Logistics Division supporting various US Navy programs. There is a need to transform data we obtain to tell stories that can help enable executive leadership to make informed decisions. With use of Wiki and Jira application tools, we will be leveraging data environment to communicate effectively, drive engagement, foster communication and high velocity learning. Share knowledge of creative ways to visualize data, apply best practices for manipulating data and create analyzable datasets. Work independently and with program leads to create visualizations, develop training and present best practices for dashboards and other visualizations. We are interested in coming up with a set of criteria to measure status/health of a project at any point of time.
